

Disinfecting and Cleaning Guide

Health | Safety | Protection

The following **Mermet Vinyl Coated Fabrics** provide a greater advantage against everyday handling making them easy to disinfect for viruses such as the flu and coronavirus (COVID-19), easy to clean, and naturally resistant to bacteria and fungus. This protection is additive-free and lasts for the life of the fabric.

- T Screen™ with KOOLBLACK® Technology
- 9803™

Disinfecting Instructions

- Use Mermet approved household brand disinfectants per the manufacturer's instructions for application and contact time, combined with the cleaning best practices listed below.

Mermet Approved Household Brand Disinfectants	
Hydrogen Peroxide Based Disinfectant	Fantastik® All-Purpose Cleaner
Contec® Sporidicin® Disinfectant	Method® Antibac
Windex® Multisurface Disinfectant Cleaner	

*Testing methods used: BIFMA HCF 8.1 Section 7 & Section 10, ASTM E2180, ASTM G21

Cleaning Instructions

- 1. Gentle:** Dust can be removed easily by using a soft duster, clean cloth, sponge, compressed air or low-suction vacuum. Apply pressure, keeping the fabric flat to prevent fabric distortion.
- 2. Moderate:** For minor stains, clean with a few drops of mild dish detergent (e.g. Dawn) per 8oz of lukewarm water using a soft brush, cloth or sponge.
- 3. Strong:** If the fabric has mold, mildew or severe stains, spot clean using a mixture of 10% diluted bleach-based cleaner (e.g. Clorox) and 90% water or use disinfecting wipes.

Cleaning Best Practices

- When possible, remove the blind and clean the fabric on a clean flat horizontal surface rather than attempting to clean a free-hanging shade. Otherwise, use a flat surface to provide a stable plane to apply pressure against.
- Following the use of Mermet approved chemicals on the surface of the fabric, rinse with clean water on front and back of the fabric thoroughly. If any odor or tackiness of the fabric remains, rinse again.
- Dry the fabric with a soft clean cloth and leave the blind hanging down until completely dry.

* For GreenScreen Evolve®, GreenScreen Revive®, Flocké®, Sparta Twilight™, Vizela™, Verona Daylight™, and Verona Twilight™ DO NOT USE WATER or wet cleaning methods. Dusting level cleaning methods can be used, but dirty spots can only be removed with a natural rubber dry-cleaning sponge
